

PROJECT NAME: BR BOOK STORE

Overview:

Using Online book store project the user can purchase books online instead of going out to a book store. The purpose of the project is to make a full functional online book store system that allow its users to search and purchase a book online based on category, author and subject. The selected books will be displayed in tabular form and then user can pick and order one or more books online

Few books from the abroad may not be available offline ,through online can be purchased books from anywhere at anytime

LOGO
